

# Time Conversion

---

## DESCRIPTION

A digital timer records time in total seconds. Given an integer  $S$  representing the total number of seconds, convert it into hours, minutes, and remaining seconds ( $H:M:S$ ).

## INPUT FORMAT

The input contains a single integer  $S$  ( $0 \leq S \leq 86399$ ).

## OUTPUT FORMAT

Print the converted time in the format  $H:M:S$  on a single line, followed by a newline.

## SAMPLE

| Sample Input | Sample Output |
|--------------|---------------|
| 3665         | 1:1:5         |
